MEASURING DEVICE, PREFERABLY A TEST STAND FOR ENGINES AND VEHICLES FOR ANALYZING EXHAUST GASES OF A COMBUSTION ENGINE)	CONFIRMATION NO. 1986

SUPPLEMENT TO INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

July 13, 2007

Sir:

With respect to the Information Disclosure Statement, filed April 2, 2007, the inventors submit some English abstracts and the following discussion.

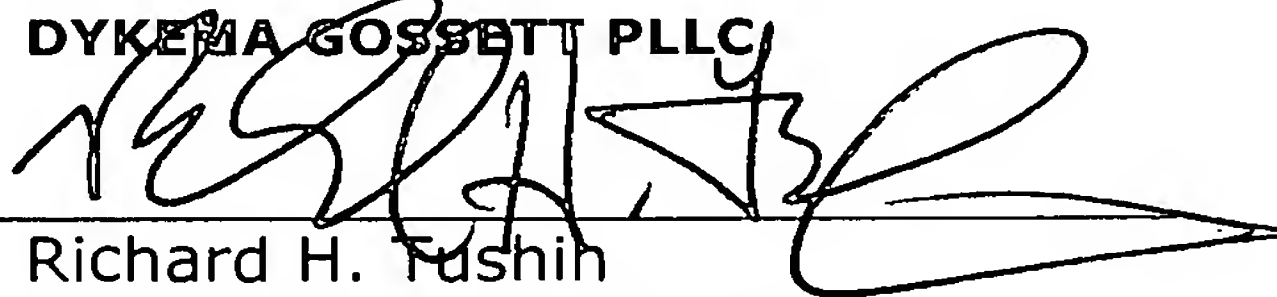

DE 20200737 discloses a measuring probe for measuring O₂ and CO in hot flue gases. A measuring probe tube comprises in its region situated in a flue gas channel a substantially cylindrically arranged measuring chamber which is sealed off by a gas-permeable filter. A heated O₂ - sensor and a CO-sensor are arranged in the measuring chamber so close to one another that the heat generated by the O₂ - sensor encloses the CO-sensor.

EP 0414446 discloses a method and an apparatus for gas analysis wherein the gas to be analyzed is taken from the exhaust gas train of an internal combustion engine and is guided with the help of a pump via a first filter to a chamber which may comprise a second filter. The gas to be analyzed is supplied thereafter to a measuring cell in which optical gas analysis is carried out by means of infrared radiation, with the concentration of CO, CO₂ and hydrocarbons being determined.

Respectfully submitted,

By:
